Robust Features With Streamlined Implementation

Digital transformation is critical to the evolution of banking, it's what your customers expect and what your employees need.

We know that starting out with a loan origination system (LOS) can be overwhelming—especially when moving away from manual processes. We also know that adopting loan origination technology is imperative to attract and retain customers and top talent in today's competitive environment.

Optimizing digital solutions makes it easier for a financial institution to implement what they need and more importantly what they are ready to use—today. Designed from industry best practices, every deal is done with the insights of bankers and the professionals at Baker Hill. Your team benefits by taking advantage of solutions built on more than four decades of walking alongside financial institutions while maintaining the scalability of Baker Hill NextGen®.

Eliminating repetitive tasks and data entry creates a better day-to-day experience for your end-users and ultimately your customers. The increased productivity frees up your teams to focus on value-added work, enabling them to close more loans faster and focus on addressing your customers' most critical needs. With just one or two additional commercial deals, you're able to fund your institution's digital transformation.

That's why we've launched Baker Hill NextGen® Accelerate.

It's the same award-winning LOS we're known for, but it's lending made easy. We've simplified and standardized the process to help banks and credit unions be set up for success when starting their digital transformations. We purposefully configured Baker Hill NextGen® Accelerate to evolve with you as your financial institution grows and matures.
